

Visio Services Print Extension

Data sheet

The oneAssist **Visio Services Print Extension** offers an extended print solution for the Visio Services of Microsoft SharePoint server, by adding long-needed functionalities for the print process, often requested by the users, to the already existing features of Visio Services. The feature integrates seamlessly into the existing user interface of the Visio Web Access web part. This approach guarantees a simple, convenient and consistent handling.

The Visio Services Print Extension within the Visio Web Access web part of the SharePoint server. The print button is displayed in the upper right corner of the screen. Note: the screenshot shows the German edition.

Once you install the Visio Services Print Extension on SharePoint server, the  print button is displayed in every Visio Web Access web part automatically.

The Visio drawing shown in the Visio Web Access web part can be directly printed from the browser. Opening the file in the Visio client is not necessary anymore.

Print preview

With the help of the print preview, selected pages from the Visio drawings can be viewed, reviewed before printing and then printed.

Every page of the diagram can be printed on an individual page. The page will include the page's name and the logo of the SharePoint website. Also, a footer can be added, which will be displayed on all pages. The footer's text type can be defined and changed by the style sheet of the application. If desired, the text position, the font size and the font color also can be changed.

System requirements

Before you install the **Visio Services Print Extension**, please make sure that your SharePoint server environment meets the system requirements.

SharePoint server requirements

The **Visio Services Print Extension** provides an upgrade to the Visio Services which are available for the following SharePoint editions:

- SharePoint Server 2013/2016 Enterprise
- Office 365 or SharePoint Online Plan which includes Visio Services
